

Steam hat for Pro-series

User Manual

Check that all parts are included in the package.
Assemble all parts according to picture. Check the edge on the steam hat for sharp edges, as sharp edges may damage the silicone seal.

There is a 4" TC flange on the top of the hat. The following accessories can be installed:

- 4" TC flange for 100mm ventilation ducting.
- Steam condenser.
- 4" TC pipework

The steam hat has four lid clamps for clamping the steam hat on to the kettle. This is necessary if using steam condenser to secure it.

Note that the steam hat gets very hot during boiling. Use the dedicated handles to avoid injury.

Also note that when removing the silicone plug for inspection, hot steam may come out.

Included in the kit:

- Steam hat (1 pcs)
- Silicone edge seal (1 pcs)
- Silicone plug (1 pcs)
